As members of Aging Life Care Association™ (ALCA), our experienced care managers are up-to-date with Aging Life Care best practices and service.

**Expert Care
to Help
Senior Adults
Live Well
and Thrive**

Concierge level of services for personalized care

CareLink: Your Experts in Aging™ is committed to...

- Helping senior adults stay **independent** as long as possible
- Ensuring **safety** (including protection from fall risk, theft, and fraud)
- Keeping senior adults **healthy** and out of nursing homes
- Planning for the **long term** (to avoid making decisions due to a crisis)

We are here when family can't be

If family lives out of town, is away on vacation, or unable to be present, senior adults - and the family - can relax knowing that each of our aging experts (often called geriatric care managers) provides a professional's "eyes and ears".

Each care plan is individualized

We create the plan of care developed especially for each senior and we oversee the fulfillment of the plan. This includes working closely with physicians, elder law attorneys, and financial advisors to ensure the best care and cost-effective services.

Senior adults and family trust us to...

- Complete an assessment in the home to see firsthand what is needed
- Screen, arrange, and monitor services for home care, home maintenance and assisted living care
- Design, implement, and manage a comprehensive plan of care
- Recommend home modifications, when needed, to decrease the risk of falling
- Coordinate medical services, appointments, and follow-up
- Monitor medication compliance
- Help navigate the complex maze of insurance filings and bill management
- Identify cost savings available through Medicare, Medicaid, Veteran Affairs, and public benefit programs
- Arrange in-home or community socializing and enrichment opportunities
- Assist with coordinating, choosing, and arranging alternative living arrangements
